Mohamed Achaq

Software Developer / UI and UX designer

|| Perfection is my law !

I'm Mohamed Achaq, I'm a Software devloper and UI/UX designer. I'm passionate about building web applications with beautiful user interfaces, great user experience and highly optimized backend services. As a software developer, I love to discover and learn new technologies and learning new design patterns and best practices, to enhance my skills and knowledge, and bring value to the projects I'm working on.

Projects

Here are some awesome projects I've worked on. All these projects are open-source and available on my Github, and all of them are live to check out.
You can check my portfolio for live versions or check my other open-source projects and libraries.

Conversa

Conversa is WebSockets based text messaging web application.
I have learned lot of techniques and patterns while working on this awesome project, especially the event driven architecture in WebSockets with socket.io which is a great tool for building realtime applications.

Technologies :

Omoide

Omoide in japanese means a memorie, and Omoide is a platform to share memories and exeriences with the world.
In the process of building this project, I learned a lot of new techniques and patterns for modeling realationships with the referencing and embeding methods in MongoDB database. Also I was focusing on making the platform user friendly by proving beautiful UI and great UX.

Technologies :

Shortify

Shortify is URL shortening platform, when I was working on this project I was focusing more on the frontend because the backend was very easy to impliment. In this project I have tried some cool loading patterns and optimistic UI methods to make the user experience better.

Technologies :

Personal Information

All you need to get in touch with me

Full Name : Mohamed Achaq
Email : contact@achaq.codes
**Phone :** 06-999-66-142
Address : Meknes, Morocco

Social

Where I'm active

Portfolio : https://achaq.codes
Github : @triyanox
Twitter : @ac__haq

Skills

Tools and technologies I use

TypeScript	Javascript	Go
Python	Rust	Node.js
Express	React	Next.js
Remix	MongoDB	PostgreSQL
GraphQL	Git	Docker
Css	Tailwindcss	Sass
UI Design	UX Design	Agile
Kanban	Scrum	

Education

Actually I have a degree in applied mathematics, but my passion for software development and my curiosity led me to study computer science online, and get very good at it. I have lot of certifications from great companies and organizations like IBM, FreeCodeCamp also I'm currently taking the CS50x course by Harvard University.

Why you should hire me?

I can bring a lot of value to the projects I'm working on, by finding great approches to solve problems and create new patterns and best practices depending on the project architecture.
